

Software Engineering

Plan

- ◇ Road Map
- ◇ MEAN Stack
 - Angular
 - MongoDB
 - Node.js
 - Express
 - Connecting Frontend with Backend
- ◇ CRUD

Road Map

Web Developer Technologies

Browsers

Browsers are the interpreters of the web.

HTML

It provides the structure of a website so that web browsers know what to show.

CSS

It let's web designers change colors, fonts, animations, and transitions on the web. They make the web look good.

Programming Languages

Programming languages are ways to communicate to computers and tell them what to do.

- ◇ Javascript
- ◇ PHP
- ◇ Ruby

Frameworks

Frameworks are built to make building and working with programming languages easier.

- ◇ Node.js
- ◇ Ruby on Rails
- ◇ .NET

Databases

Databases are where all your data is stored.

- ◇ MongoDB
- ◇ MySQL
- ◇ PostgreSQL

Required for any path

Git - Version Control

SSH

HTTP/HTTPS and APIs

Basic Terminal Usage

Learn to Research

Data Structures & Algorithms

Character Encodings

Design Patterns

GitHub

Create a profile. Explore relevant open source projects. Make a habit of looking under the hood of projects you like. Create and contribute to open source projects.

Web Developer in 2018

● Now build something

MEAN Stack

“MEAN is an acronym for MongoDB, ExpressJS, AngularJS and Node.js.

MEAN is a user-friendly full-stack JavaScript framework ideal for building dynamic websites and applications”

MEAN Stack

MONGO DB

{name: mongo, type: DB}

EXPRESS JS

Web dev framework for Node JS

ANGULAR JS

Super Heroic Frontend Framework

NODE JS

Event based Concurrency Environment

MEAN Stack

MongoDB

MongoDB is an open source, document-oriented database designed with both scalability and developer agility in mind.

ExpressJS

Express.js is a Node.js web application server framework, designed for building single-page, multi-page, and hybrid web applications.

Angular

Angular is a structural framework for dynamic web apps.

NodeJS

Node.js is an open-source, cross-platform runtime environment for developing server-side web applications.

Angular

Angular

Client
(Browser)

HTML

CSS

JavaScript

Single Page

Updates DOM

Handles Routing

Reactive user
experience

MongoDB

- ◇ Flexible Schema Design.
- ◇ JSON Document Model.
- ◇ Aggregation Framework & MapReduce.
- ◇ Auto-Sharing for Horizontal Scalability.
- ◇ Full, Flexible Index Support & Rich Queries.

Expressive Query Language
& Secondary Indexes

Strong Consistency

Enterprise Management
& Integrations

Flexibility

Scalability
& Performance

Always On,
Global Deployments

Launch server

**Allows database
operations**

Launch client

**Allows
interacting with
database**

MongoDB Terminology

<i>MongoDB</i>	<i>Relational DB</i>
Collection	Table
Document	Row
Index	Index
Embedded Document	Join
Reference	Foreign Key

MongoDB Setup

MongoDB Community Server:

<https://www.mongodb.com/download-center?jmp=nav#community>

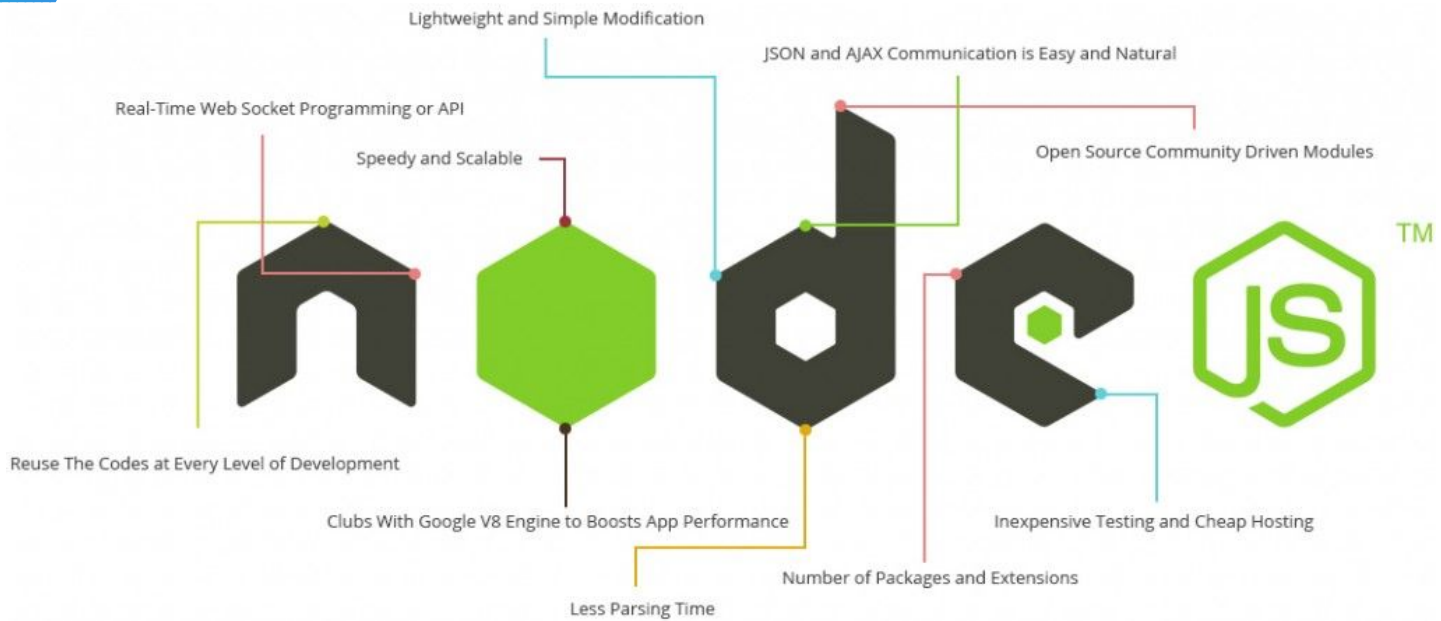

Documentation:

<https://docs.mongodb.com/manual/installation/>

The screenshot displays the MongoDB Download Center interface. At the top, the title 'MongoDB Download Center' is centered. Below it, a navigation bar includes links for Atlas, Community Server (which is highlighted in green), Enterprise Server, Ops Manager, Compass, and Connector for BI. The main content area is titled 'Current Stable Release (3.6.2)' and includes links for '01/10/2018: Release Notes | Changelog' and 'Download Source: tgz | zip'. It features three tabs for operating systems: Windows (selected), Linux, and OSX. Under the Windows tab, there is a 'Version:' dropdown menu currently set to 'Windows Server 2008 R2 64-bit and later, with SSL support x64'. Below this, the 'Installation Package:' section contains a green 'DOWNLOAD (msi)' button. At the bottom of the main content area, there is a link for 'Binary: Installation Instructions | All Version Binaries'. A footer banner at the very bottom encourages users to 'Deploy a free cluster in the cloud with MongoDB Atlas, our database service that gets you up and running in minutes.'

Node.js

Client
(Browser)

Server

Server

- ◇ Handle Requests
- ◇ Parse Data
- ◇ Generate & Send Responses
- ◇ File Operations

NodeJS Setup

NodeJS current:

<https://nodejs.org/en/>

Node.js® is a JavaScript runtime built on [Chrome's V8 JavaScript engine](#). Node.js uses an event-driven, non-blocking I/O model that makes it lightweight and efficient. Node.js' package ecosystem, [npm](#), is the largest ecosystem of open source libraries in the world.

[Spectre and Meltdown in the context of Node.js.](#)

Download for Windows (x64)

8.9.4 LTS

Recommended For Most Users

9.5.0 Current

Latest Features
